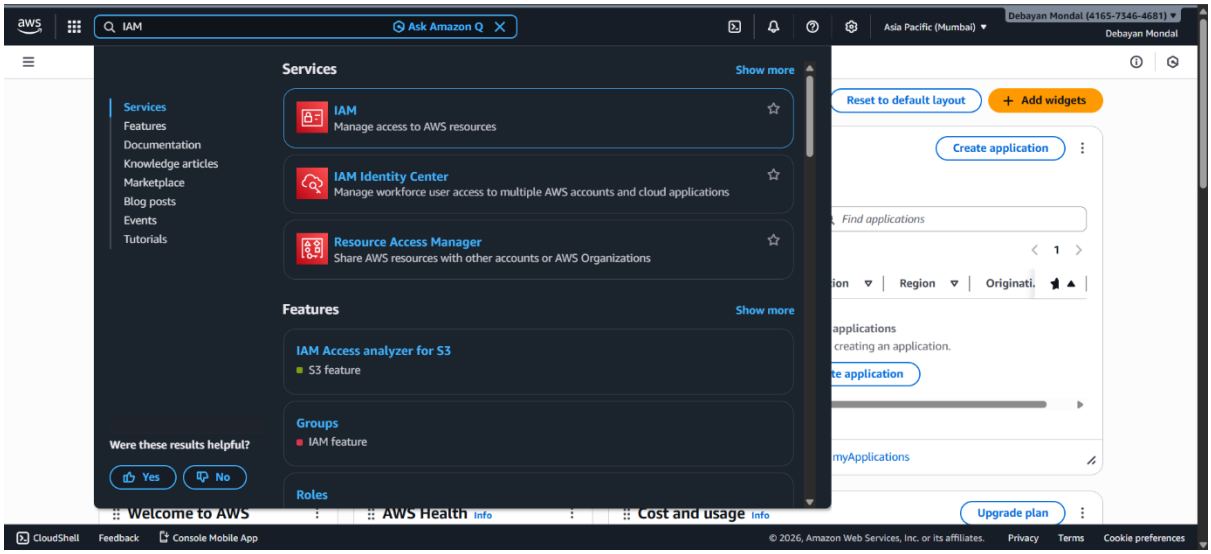
Name: Debayan Mondal **Roll. No:** 135 **ExamRoll:** 11600223142

Assignment No.:3

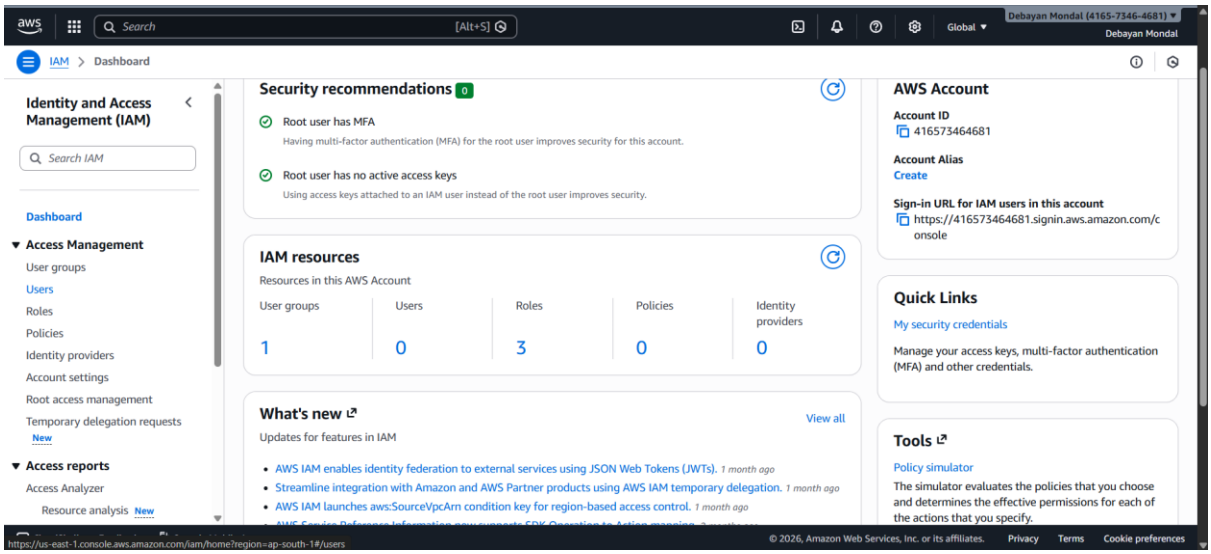
Problem Statement: Create IAM user and give full access to S3

Solution:

Step 1: Search **IAM** on the Search bar and click on it.

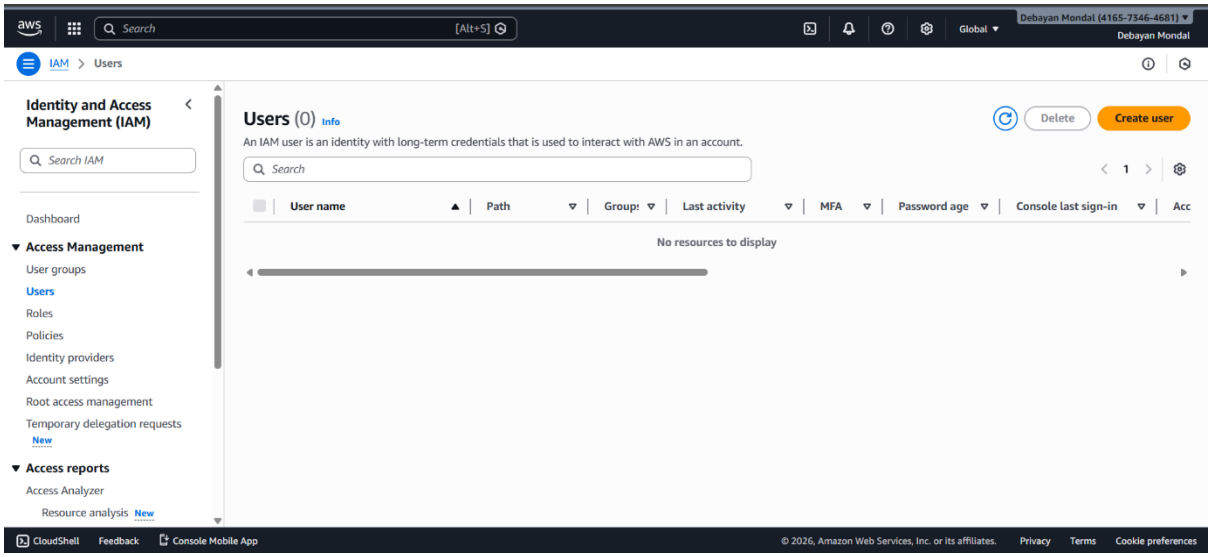


Step 2: On this page click on the **Users**.

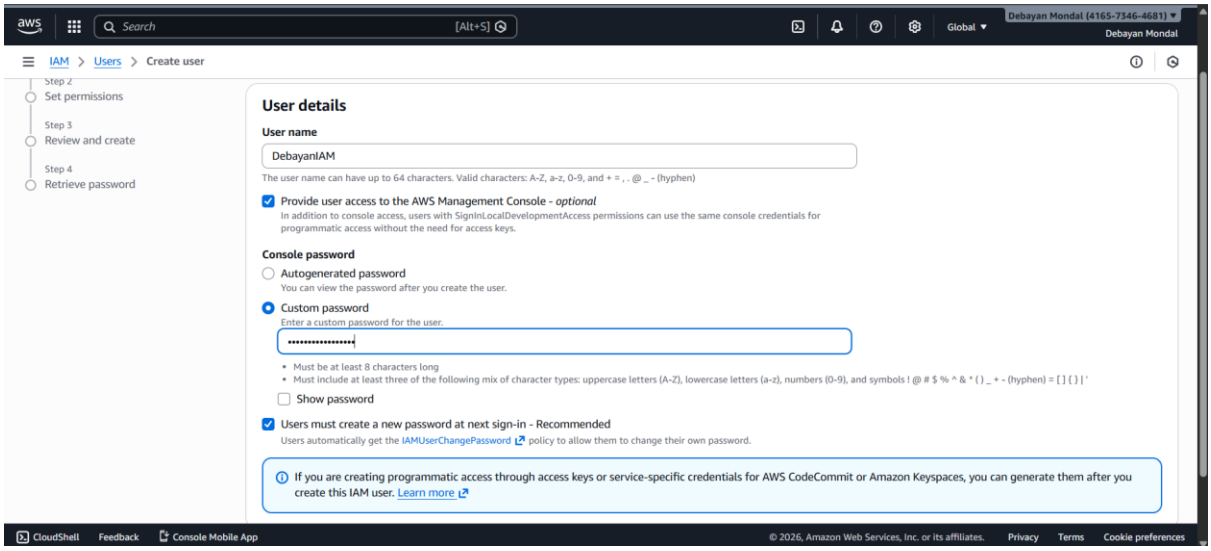


Name: Debayan Mondal **Roll. No:** 135 **ExamRoll:** 11600223142

Step 3: In the **Users** page click on **Create User** button.

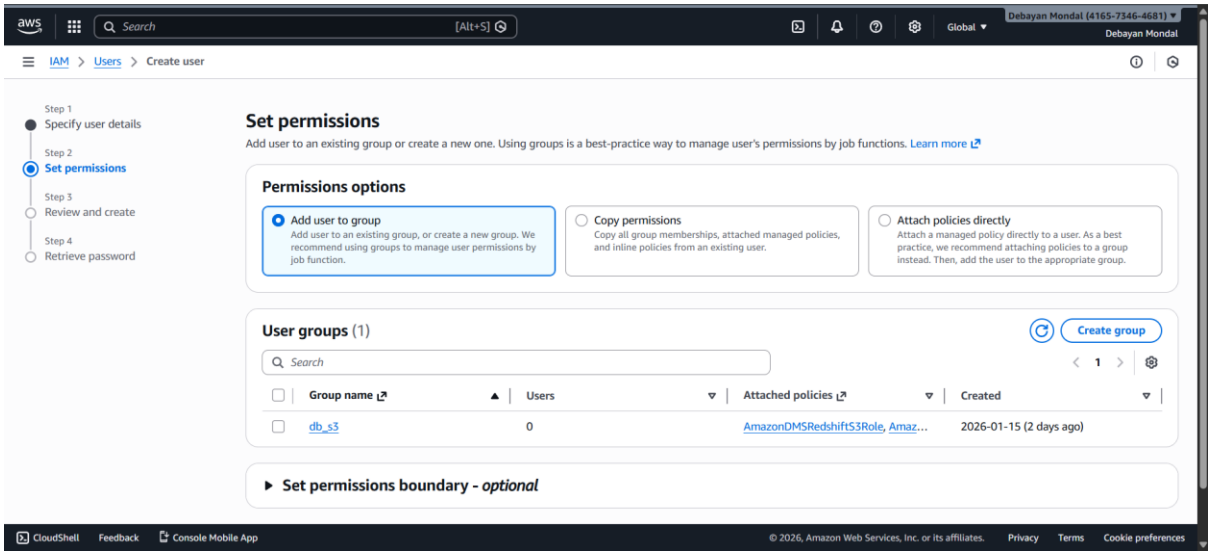


Step 4: In the **User details** page Enter the **Username**, check the box **Provide user access to the AWS management Console**, Click **Custom Password** and enter a custom password then select **next**.

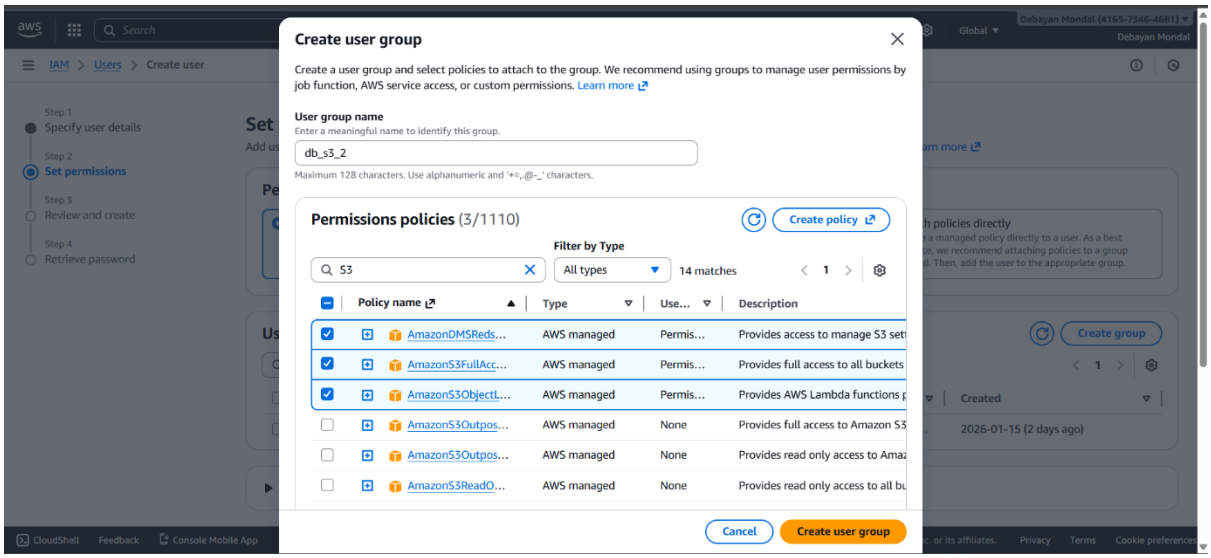


Name: Debayan Mondal **Roll. No:** 135 **ExamRoll:** 11600223142

Step 5: Under the **Set permission** click on **Create group** to create a new group.

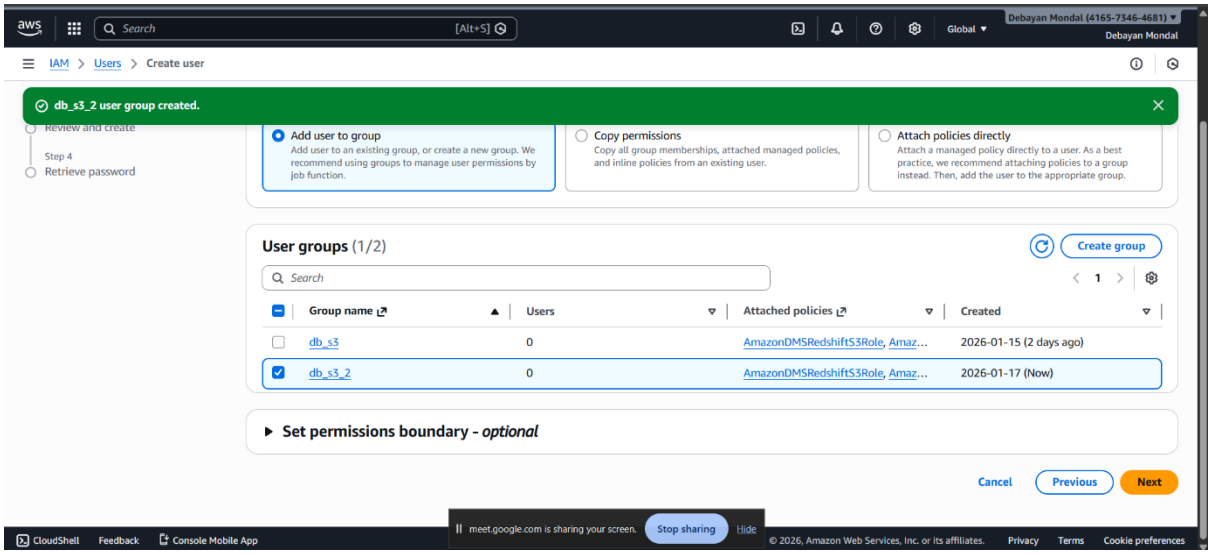


Step 6: Enter user group name and select the necessary permissions to give and create **Create user group**.

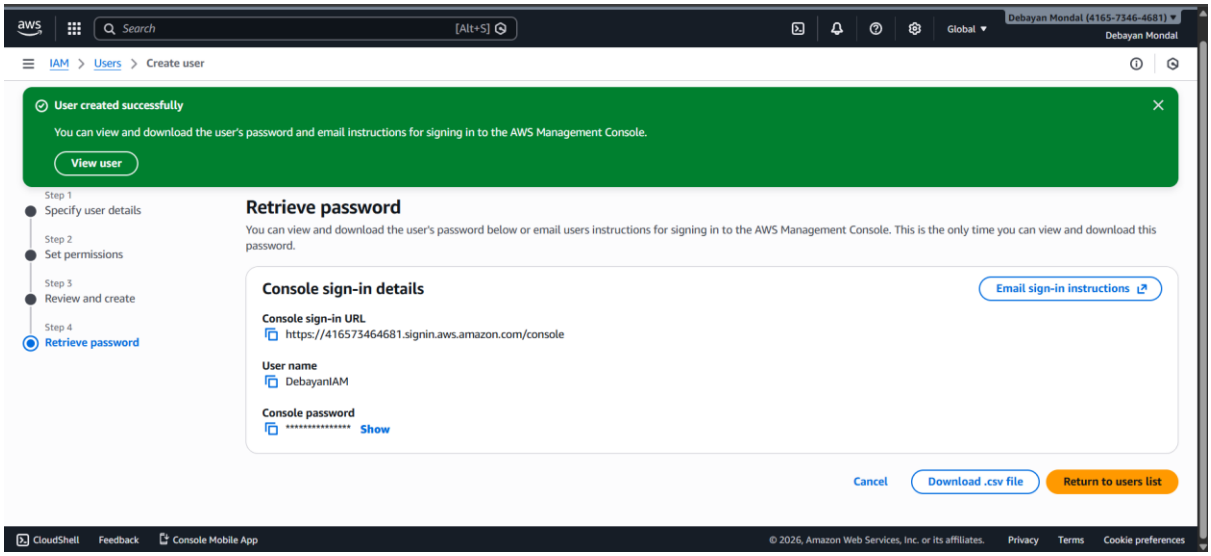


Name: Debayan Mondal **Roll. No:** 135 **ExamRoll:** 11600223142

Step 7: The user group has been successfully created and then click on **next**.

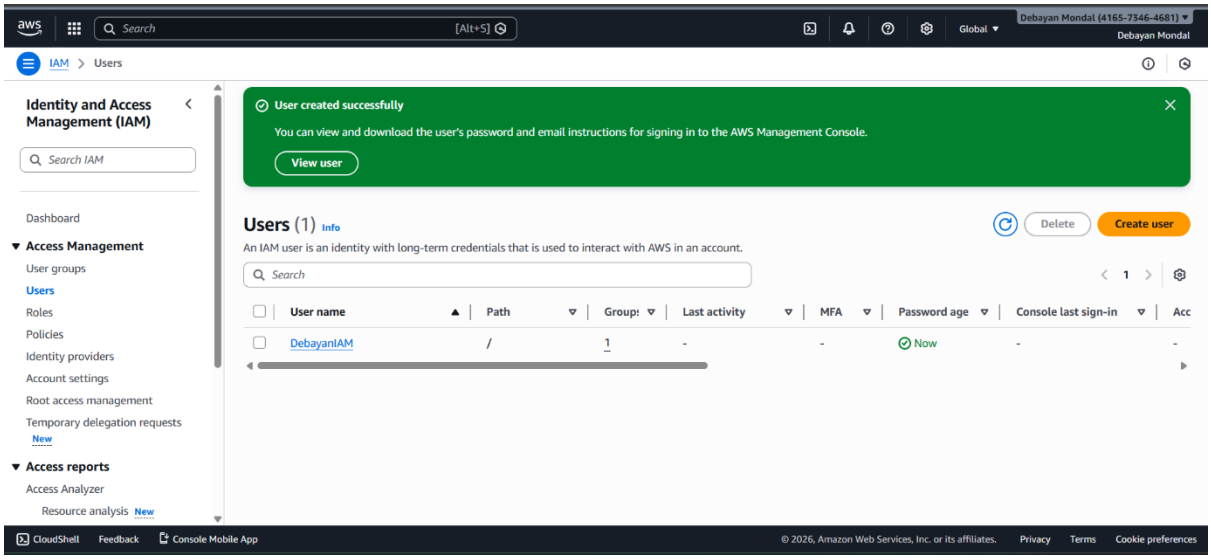


Step 8: The User is successfully created, we can download the .csv file if necessary. Click on **Return to user list.**



Name: Debayan Mondal **Roll. No:** 135 **ExamRoll:** 11600223142

Step 9: User is successfully created and we can see it under the **Users**.



Step 10: After login into the IAM account we can see that the account can access S3 but not other elements.
